

Gamit Check Design System

A compact set of interface decisions for the personal inventory application. Every token and component below comes from the approved screen map and wireframes.

A Styling approach

Plain CSS

Semantic custom properties keep the React interface consistent without adding a UI framework.

src/styles.css
:root { ... }

B Core colour tokens

#256B4A

--color-primary
Buttons, links, focus and active states
White text: 6.40:1

#B42318

--color-accent
Destructive confirmation only
White text: 6.57:1

#F6F7F8

--color-bg
Application background
Text: 13.69:1

#FFFFFF

--color-surface
Cards, forms and panels
Text: 14.68:1

#1F2937

--color-text
Headings and body copy
On surface: 14.68:1

C Type scale

HEADING	Inventory	28 px / 700
BODY	Track what you own and where it is stored.	14 px / 400
SMALL	Labels, captions and footer text	12 px / 400

D 8 px spacing rule

--SPACE-1

8 px · tight

--SPACE-2

16 px · groups

--SPACE-4

32 px · sections

--PAGE-PADDING

32 / 18 px

F Responsive plan

Desktop

761 px and above

Shared navigation

- Persistent sidebar
- Multi-column cards and paired form fields
- 32 px screen-edge padding

Phone

760 px and below

- Navigation collapses into menu
- Cards and form fields stack
- 18 px padding; no scroll at 375 px

Accessibility check

✓

All text/background pairs meet at least 4.5:1 contrast.

✓

Semantic header, nav, main, footer and button elements.

✓

Meaningful images have alt text; decorative art is hidden.

✓

Every form control has a matching visible label.

✓

Keyboard focus is visible and every action is reachable by Tab.
